PowderCoating model XL powder coating oven/ composite oven

**PowderCoating model XL powder coating oven
that can also be used for composite curing.**

- **Internal size:** 160 × 8 × 60
(57cm where heating element is) cm
- **Temperature control** up to 220 degrees Celsius.
Reaches 180 degrees Celsius in 25 minutes and
maximum temperature in 35 minutes.
- Comes with UK standard 13 amp plug or Schuko plug if
you are from another European country.
- Requires standard 230V single phase 50 Hz electricity so
can be used in any workspace.
- Uses just 2800w of electrical power so regular 16amp
circuit breakers are sufficient.
- **Weight:** 100kg.
- Oven is made in Lithuania and we provide customer sup-
port after purchase and all the spare parts if you need
any. Oven is CE marked and comes with a 24 months
warranty.
- Oven comes with two steel hangers and UK or EU
(Schuko) power cable depending on your country.
